- **Business & Stakeholder Management:** Requirements Gathering, Process Mapping, KPI Reporting, Business analysis and insights, Stakeholder Management
- **Automation & AI:** Power Automate, SharePoint, Workflow Automation, Agentic AI, LLM, SOP Development, Agile Delivery, Defect Triage

PROFESSIONAL EXPERIENCE

Accenture, India | Bengaluru | BI Engineering Lead | Jan 2024 – Present

- Lead BI and analytics work supporting 50–60 audits per fiscal year across audit, risk and business reporting, using SQL, BigQuery, Python and Power BI.
- Built fraud-risk analytics across HR, Finance, Procurement and Payroll to identify control gaps and support risk reviews.
- Work with Product Managers, business stakeholders and engineering teams to define requirements, analyze data and resolve delivery issues.
- Develop Power BI dashboards and reporting models using data from multiple sources, translating business requirements into KPI-driven reports for audit and business stakeholders.
- Apply statistical analysis, data validation and root cause analysis to identify trends, recurring issues and reporting errors.
- Automated recurring reporting and business workflows using Power Automate and SharePoint, reducing report preparation time by 40%.
- Create interactive data visualizations and executive dashboards to track KPIs, identify trends, and support data-driven decision-making.
- Part of a 5-member analytics team; mentor and directly manage 2 analysts, maintaining consistent standards for analysis, documentation, data validation and reporting.

Agentic AI Audit Assistant | Agentic AI, LLM, IA3 Status Tracker

- Developed an Agentic AI assistant, connected to the IA3 status tracker, that lets users query audit and contingency information — audit status, assigned owner, current handler — in natural language.

LOD2 Dashboard | Nov 2025 – Feb 2026 | SharePoint, Excel, Power BI

- Delivered interactive Power BI dashboards using SharePoint and Excel data sources, enabling consolidated business and audit reporting.

Dap'er Tool | Sep 2025 – Oct 2025 | Power Automate, SharePoint

- Automated workflow tracking and reporting using Power Automate and SharePoint, reducing manual follow-up effort by 40%.

Type B to Type A Analytic Conversion | Apr 2024 – Aug 2024 | SQL, BigQuery, Power BI, Excel

- Converted legacy Type B analytics to Type A using SQL, BigQuery and Power BI, delivering standardized, business-ready reporting.

Aligned Assurance Dashboard | Oct 2024 – Dec 2024 | SQL, BigQuery, Power BI, Excel

- Built SQL/BigQuery-based analytics and Power BI dashboards to track assurance metrics for audit and compliance reporting.

Commvault, India | Bengaluru | Database Segment Specialist | May 2021 – Jan 2024

- Coordinated large-scale data projects with clients, defining query, extraction and reporting approaches to support end-to-end data analysis.
- Developed SOPs to resolve recurring data-quality gaps, improving reporting consistency and reducing rework for the team.

- Built SQL Server ETL pipelines using Derived Column, Conditional Split, Union All, Lookup and Merge transformations to load and validate large-scale datasets.
- Designed interactive Power BI dashboards using Action Filters, Parameters, DAX and Calculated Fields, tailored to specific business reporting needs.

Marketing Operations Campaign Activity | Aug 2022 – Jan 2023 | Power BI, SQL

- Built Power BI and SQL-based reporting to track and analyze marketing campaign performance.

SFDC Campaign 360 | May – Jun 2022 | Power BI, SQL, Salesforce

- Developed campaign reporting using Power BI, SQL and Salesforce data to support marketing performance tracking.

Audience as a Service Dashboard | Sep – Dec 2021 | Power BI, SQL, Salesforce

- Built a Power BI dashboard using SQL and Salesforce data to support audience segmentation and targeting analysis.

Amazon, India | Bengaluru | Business Intelligence Analyst | Apr 2017 – May 2021

- Led a team implementing data mappings and reusable transformations for recurring data loads from SQL Server, Oracle and spreadsheet sources.
- Developed Power BI dashboards and Excel reports using SQL-based data extraction to support business analysis and decision-making.
- Developed SOPs, led CAPA sessions and used root cause analysis to address data gaps and recurring reporting issues.
- Applied predictive analytics, SQL-based ETL and marketing and pricing analysis to support business decisions and promotional strategy.

Amazon, India | Bengaluru | Product/Pricing Analyst | Apr 2015 – Apr 2017

- Supported Amazon Retail Systems Platform operations for vendors and buyers and worked with stakeholders on business and operational requirements.
- Conducted root cause analysis for recurring issues, tracked business goals and SLA metrics, and supported operational improvements.
- Reviewed errors, organized CAPA sessions and updated guidelines and SOPs for operations teams.
- Analyzed marketing and market data to support policy decisions, sales initiatives and promotional strategy.

Pricing Strategy | Feb 2021 | Excel, SQL

- Used Excel and SQL to support pricing analysis and business decision-making.

AWARDS & RECOGNITION

- Client Value Creation Recognition
